..Our New Tomato..

For 1902.

Maule's Enormous.

This very distinct and most promising new variety, of bright red color, is the latest addition to the large tomato family. It is thicker, heavier, and more solid than any, making it easily the most handsome sort in cultivation. It is unsurpassed in quality, and in the production of fine large fruits. Perfectly adapted to main crop planting, yet it will take first rank for size. The form is perfect, uniform, large and attractive. Flesh is very firm. It is a robust grower, setting its fruit well, and is therefore a heavy cropper. It ripens early, does not crack around the stem, and the flavor is most desirable. We offer it in the expectation that it will please all.
